MEMORANDUM FOR RECORD

SUBJECT: Blue Lake Site Visit - LRL-2011-922-sam

1. A site visit was made to the Blue Lake Campgrounds on July 10, 2012, to meet with Greg Carlson from EPA to further evaluate the extent of unauthorized fill.
2. During the evaluation, the area where data points 2 and 4 were collected on September 13, 2011, were re-visited to identify if additional sources of hydrology were present. The inspection identified sediment deposits and crayfish burrows for additional sources of hydrology at site 2 and sediment deposits for site 4. These additional sources of hydrology have been noted on the data forms with the date of the change.
3. Additionally, the data sheets from September 13, 2011, were annotated with the soil textures that were left off of the original data sheets.

A handwritten signature in black ink, appearing to read "Scott J. Matthews", with a large, sweeping loop at the end.

Scott Matthews
